

Health Trainers Certificate at Level 3 (New Version)

Our aim is to supply low maintenance solutions, enabling health trainer managers to get on with their work. If you're new in post, we offer our customers support on guidance with training and development issues and retention. If you need some other form of support or advice we will help if we can.

We offer start dates to suit you throughout the year and occupational specialists to ensure appropriate learning. Also included are team development and health trainer networking opportunities.

If you would like to use your current year's under-spend for training during the coming year, simply pre-purchase courses with Proud City and book a delivery time to suit you: subject to an available time slot. **Request an invoice now**

Our goal is motivated and competent health trainer teams and satisfied customers.

We will customise an appropriate solution to meet your needs.

Delivery models can be made up of:

- assessment and accreditation service
- full delivery with complete course programme
- customised development package assessment and accreditation
- relocated candidate accreditation of prior achievement, assessment and certification

If your health trainers need more help to reach into their target communities, we can help with that too, plus routes of progression to help keep your valuable health Trainers engaged.

To arrange a meeting or for more information about what Proud City can offer, please ring Mike Felse on 07941 384 987 or leave a message for us at 0161 872 1990
